EDUCATION

- 2019 **Ph.D., Biomedical Engineering**
The University of Texas at Austin (UT Austin)
Dissertation: “Remodeling of the mitral valve: an integrated approach for predicting long-term outcomes in disease and repair”
Supervisor: Dr. Michael S. Sacks
- 2016 **M.S.E., Biomedical Engineering**, UT Austin
- 2014 **B.S. (with Highest Honor), Biomedical Engineering**
Georgia Institute of Technology (Georgia Tech)
Minor: Chemistry

PROFESSIONAL EXPERIENCE

- 08/2023–Present **Assistant Professor**, Department of Biological & Agricultural Engineering, LSU
- 02/2020–08/2023 **Postdoctoral Associate**, Department of Biomedical Engineering, Yale University

FUNDING

- 01/2025–12/2025 **“Leveraging electronic health records and advanced image processing to identify and address disparities in the diagnosis and treatment of valvular heart disease”**
- Multi-investigator award with Dr. B.V. Rego (PI) and Dr. Jorge A. Castellanos (Co-I, Our Lady of the Lake Regional Medical Center)
 - Source: LSU Foundation, with funds from Our Lady of the Lake Health
 - Award type/ID: Collaboration in Action Program
 - Total award: **\$111,182**
- 01/2025–12/2025 **“Sensor-embedded vascular graft for wireless monitoring of hemodialysis patients”**
- Multi-investigator award with Dr. Robert Herbert (PI, LSU), Dr. B.V. Rego (Co-I, LSU), and Dr. Hector Ferral (Co-I, LSU Health New Orleans)
 - Source: LSU Provost’s Fund for Innovation in Research
 - Award type/ID: Big Ideas in STEM and Social & Behavioral Sciences
 - Total award: **\$50,000**
- 07/2018–06/2020 **“Characterization of patient-specific mitral valve remodeling to improve surgical repair”**
- Source: American Heart Association (AHA)
 - Award type/ID: Predoctoral Fellowship, 18PRE34030258
 - Total award: **\$53,688**
 - 0.19% percentile rank (top score out of 534 proposals)
 - Terminated in 01/2020 after completion of Ph.D.
- 06/2015–05/2018 **“A coupled mitral valve–left ventricle model for improved mitral valve repair”**
- Source: National Science Foundation (NSF)
 - Award type/ID: Graduate Research Fellowship, DGE-1610403
 - Total award: **\$138,000**

HONORS & AWARDS

2023	Top Cited Article , International Journal for Numerical Methods in Biomedical Engineering
2022	Journal Cover Feature , Annals of Biomedical Engineering
2021	Journal Cover Feature , International Journal for Numerical Methods in Biomedical Engineering
2020	Top 10% Article , International Journal for Numerical Methods in Biomedical Engineering
2019–2020	Engineering Foundation Endowed Graduate Presidential Scholarship , \$2,900
2019	Top 20 Article , International Journal for Numerical Methods in Biomedical Engineering
2019	Journal Cover Feature , Annals of Biomedical Engineering
2018	Journal Cover Feature , International Journal for Numerical Methods in Biomedical Engineering
2016–2019	Professional Development Award (UT Austin Graduate School) , \$830
2015–2019	LeRoy H. Cole Endowed Graduate Fellowship in Engineering , \$36,000
2015–2019	Dean's Prestigious Fellowship Supplement , \$8,700
2014–2015	Thomas Marschall Runge, M.D. Endowed Presidential Fellowship , \$3,500
2014	CRLA International Tutor Training Program Certification , Level III – Certified Master Tutor
2013	President's Undergraduate Research Award , \$1,500
2010–2014	Sidney Goldin Scholarship , \$24,600
2010–2011	George W. Woodruff Scholarship , \$4,000
2010–2011	ED Academic Competitiveness Grant , \$750

RESEARCH

- 08/2023–Present **Principal Investigator, Cardiovascular Engineering Lab, Department of Biological & Agricultural Engineering, LSU**
- Experimental investigation of cardiovascular function, diseases, and therapies
 - Image-based computational modeling for prognosis and treatment planning
 - Machine learning and data science for real-time biomechanical simulation
- 02/2020–08/2023 **Postdoctoral Associate, Continuum Biomechanics Lab (PI: Dr. Jay D. Humphrey), Department of Biomedical Engineering, Yale University**
- Developed a multiscale modeling framework for postnatal development and maturation of the thoracic aorta
 - Investigated aortic function and remodeling in Marfan syndrome under normal and inhibited collagen cross-linking
 - Developed machine learning models to predict progression of aortic dissections and causes of aortic aneurysms
 - Implemented uncertainty quantification in network models of mechanotransduction and intracellular signaling
 - Derived Bayesian methods to quantify uncertainties in image-based estimates of vessel mechanical properties, with applications to the study of abdominal aortic aneurysms (AAAs) with varying degree of intraluminal thrombus
- 08/2014–01/2020 **NSF Graduate Research Fellow & AHA Predoctoral Fellow, James T. Willerson Center for Cardiovascular Modeling and Simulation (PI: Dr. Michael S. Sacks), Oden Institute for Computational Engineering and Sciences, UT Austin**
- Developed predictive models of heart valve growth and remodeling that integrate tissue and cellular responses, with applications to both non-pathological (e.g., pregnancy) and pathological (e.g., infarction) perturbations
 - Studied the effects of myocardial infarction on the *in vivo* geometry, structure, and deformation of the mitral valve
 - Developed computational methods and clinical tools for real-time assessment of heart valve function
 - Quantified structural and mechanical properties of heart valve tissues
 - Formulated and validated structural constitutive models for heart valve leaflets
- 08/2013–12/2013 **Senior Design Project Leader, Department of Biomedical Engineering, Georgia Tech**
- Partnered with a local cardiothoracic surgeon to identify needs for medical device innovation in cardiac surgery
 - Led a team of 4 students to design a novel dual-function Yankauer wand for use in coronary anastomosis surgery
 - Presented a functional prototype of the device at the Georgia Tech Capstone Design Expo (runner-up for Best Biomedical Engineering Project)

01/2012–08/2013 **Undergraduate Research Assistant, Sulchek BioMEMS & Biomechanics Lab (PI: Dr. Todd A. Sulchek), Parker H. Petit Institute for Bioengineering and Bioscience, Georgia Tech**

- Designed and manufactured a high-throughput microfluidic device to sort cell-like particles by size
- Led a project to characterize the thermal bonding properties of cast and extruded PMMA acrylic
- Mentored new lab members in laser cutting, engraving, and marking for the fabrication of microfluidic devices

01/2012–05/2012 **Member, Computational Structural Biology Team (PI: Dr. Stephen C. Harvey), Vertically Integrated Projects Program, Georgia Tech**

- Tested and compared the performance of various energy minimization algorithms for modeling van der Waals interactions between noble gas atoms and polyatomic molecules
- Developed web-based tutorials for simulating 3D biomolecular dynamics, to be used as instructional material in *BIOL 4105/7110: Macromolecular Modeling*

TEACHING

01/2024–Present **Instructor, Department of Biological & Agricultural Engineering, LSU**

- Redesigned and taught *BE 2352: Quantitative Biology in Engineering* (Fall 2024) – Characterization of biological phenomena in engineering design; relationships among parameters using linear and nonlinear statistical expressions; case studies of engineering design solutions
- Designed and taught *BE 4910: Data Analysis and Modeling in Biological Engineering* (Spring 2024, Spring 2025) – Overview of contemporary statistical analysis and mathematical modeling approaches, with a focus on applications in biological engineering research, analysis, and design

09/2022–11/2022 **Student, *An Introduction to Evidence-Based Undergraduate STEM Teaching*, Center for the Integration of Research, Teaching and Learning (CIRTL)**

- Explored key learning principles, such as the role of students' prior knowledge, mental models, and knowledge organization, as well as effective approaches for providing feedback and designing assessments
- Developed strategies for fostering inclusive classroom environments, with an emphasis on how to draw on diversity in the development of teaching plans and how inequities can negatively impact learning if not addressed
- Created an annotated active learning-based lesson plan for an undergraduate-level engineering course

01/2016–05/2016 **Student, *ME 397: Teaching Engineering*, UT Austin**

- Led and participated in thorough discussions of STEM educational theory, trends in university-level engineering education, inductive and deductive learning, problem-based learning, and metacognition
- Developed active learning modules and implemented traditional and novel teaching methods in the classroom
- Practiced evidence-guided syllabus design for core engineering courses and technical electives

08/2013–05/2014 **One-to-One Tutor, Center for Academic Success, Georgia Tech**

- Tutored undergraduate students in 12 math, science, and engineering courses for 230 cumulative hours
- Completed 15 weeks of formal training in technical instruction and tutoring at the Center for the Enhancement of Teaching and Learning at Georgia Tech
- Gained sufficient training and hands-on experience to receive a Level III Master Tutor certification (highest available) from the College Reading and Learning Association (CRLA)

08/2013–12/2013 **Teaching Assistant, Department of Biomedical Engineering, Georgia Tech**

- Aided in the coordination of group projects in *BMED 3510: Biomedical Systems and Modeling*
- Led recitation sessions in MATLAB/Simulink modeling of physiological and biomedical systems
- Helped grade class assignments as well as compile supplementary lecture materials and problem solutions

MENTORING & ADVISING

09/2023–Present **Department of Biological & Agricultural Engineering, LSU**

- Mentoring graduate and undergraduate research assistants in the Cardiovascular Engineering Lab
- Serving as a faculty advisor to help undergraduate students adjust their plan of study, establish their career path, and identify/utilize on-campus resources to ensure academic success
- Designed and developed a web-based [interactive tool](#) for students to plan their course of study and path to graduation within the Biological Engineering major
- (2024–2025) Serving as a faculty advisor for *BE 4390/4392: Senior Engineering Design* to guide students as they design, construct, and evaluate a novel device for mechanical testing of isolated muscle specimens
- (2023–2024) Served as a faculty advisor for *BE 4390/4392: Senior Engineering Design* to guide students as they design, construct, and evaluate a novel device for high-throughput sectioning of soybeans

07/2021–05/2022 **Department of Biomedical Engineering, Yale University**

- Mentored a first-year medical student (Yale School of Medicine) in segmentation of elastin fibers from Verhoeff-stained slides to find correlations between elastin microstructure and thoracic aortic aneurysm characteristics
- Mentored an undergraduate student whose Senior Project focused on quantitative assessment of collagen fibril structure in Marfan syndrome using transmission electron microscopy (TEM) images
- Supervised a visiting student in analysis of histological stains of human aortic tissues to quantify lamellar and interlamellar elastin content using machine learning, probabilistic segmentation, and interactive validation

01/2015–01/2020 **Willerson Center, Oden Institute, UT Austin**

- Mentored lab members in the experimental characterization of heart valve leaflet structure and properties, especially through biaxial tensile testing and small-angle light scattering (SALS)
- Served as a graduate mentor for the Moncrief Undergraduate Summer Internship Program (2018), and supervised a visiting student in medical image segmentation and patient-specific modeling of mitral valve repair
- Led a team of 5 undergraduate students to design, manufacture, and validate a biaxial mechanical testing device for the characterization of planar soft tissues

COMMUNITY OUTREACH

- 2024 Served as an advisor for a team of high school students competing in Science Olympiad.
- 2023 Served as a judge for the Connecticut Science & Engineering Fair (middle school and high school levels, Engineering category).
- 2022 Participated in a BMES Diversity Committee special session to address inclusion in STEM for people with disabilities. Identified attitudinal and physical barriers faced by scientists with disabilities at different career stages, and discussed social, architectural, and technological solutions to ensure inclusivity.
- 2021 Participated in “The Promise of NHLBI Data Science Workshop” (NIH, virtual meeting). Addressed knowledge gaps in understanding and utilizing NHLBI health datasets (e.g., BioData Catalyst), and facilitated collaborations between domain experts and computer scientists, engineers, and statisticians.
- 2018, 2019 Volunteered at “Explore UT,” an annual event that aims to broaden the horizons of K-12 students in Texas and motivate them toward pursuing higher education after high school. Directed a lecture and Q&A session geared toward high school students about cardiovascular disease, treatment/prevention thereof, and emerging research in the field.
- 2017–2018 Served as a Life Sciences Industry Liaison in the Society for Industrial and Applied Mathematics (SIAM, Austin Chapter).

- 2017 Volunteered at “Introduce a Girl to Engineering Day” (UT Austin). Collaborated with Women in Biomedical Engineering (WBME) to enact an activity in which 4th-8th grade students iteratively designed, created, and tested their own prosthetic hand devices.
- 2016 Participated in and presented work at the 7th Summer School on Biomechanics of Soft Tissues: Multiscale Modeling, Simulation, and Applications (Graz, Austria).
- 2016 Developed and organized an educational activity to teach middle school students about RNA processing and protein synthesis. Activity was enacted at a “Hot Science – Cool Talks” outreach event at UT Austin.
- 2015 Served as a Graduate Student Recruitment Liaison for the Department of Biomedical Engineering at UT Austin. Introduced prospective graduate students to the program, university, and city. Organized and attended recruitment-related lab tours, poster sessions, faculty/student meetings, and a welcome dinner.
- 2012–2014 Tutored elementary and middle school children in low-income areas of Atlanta as part of a STEM education outreach program organized by The Tau Beta Pi Association.
- 2011–2013 Volunteered at MedShare (Atlanta, GA) to receive hospital and manufacturer donations of surplus medical supplies and equipment. Helped repair and repackage equipment as needed so that it could be redistributed to healthcare facilities in developing countries.
