Annual Investment: \$4,000,000

***Program Specialists (Faculty):** Crawfish Poultry
 Curriculum Soil Chemistry
 Evaluation Urban Programming
 Irrigation

The LSU AgCenter has seen significant reductions in extension personnel over the last decade. To meet the needs of stakeholders statewide, Extension Service staffing requires a reinvestment to ensure a basic service level. These positions are needed statewide in the areas of agricultural and natural resources, family and consumer science (health/nutrition), 4-H youth development, urban programming and communications support.
