

4 February 2014

SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

## Wind Wood Utilization

*Wind Wood Utilization is the hub for information specifically relating to the preparation for, response to, recovery from major wind events and the utilization of **downed & damaged timber and woody debris** that can be generated.*

- Looking for a specific service provider: forester, logger, trucking contractor?
- Searching for a market(s) for a wood product?
- Trying to figure out who in government is responsible for what?
- Looking for fuel, equipment parts, lodging, etc. outside of your normal area of business operation?
- Looking for answers to keep you from reinventing the wheel?
