SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

A new study by nine scientists and forestry experts—a broad examination of carbon accounting for forestry, wood products and biomass, to ensure that the full environmental benefits of biomass are realized—was recently published in the [*Journal of Forestry: "Forest Carbon Accounting Considerations in U.S. Bioenergy Policy."*](#) The new study is an important addition to the growing body of scientific work that recognizes the carbon benefits of forest biomass and forest bioenergy.
