SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

OK, this is too cool for words.....

Beth Moon, a photographer based in San Francisco, has been searching for the world's oldest trees for the past 14 years. She has traveled all around the globe to capture the most magnificent trees that grow in remote locations and look as old as the world itself. *"Standing as the earth's largest and oldest living monuments, I believe these symbolic trees will take on a greater significance, especially at a time when our focus is directed at finding better ways to live with the environment"* writes Moon in her artist statement. Sixty of Beth Moon's duotone photos were published in a book titled *"Ancient Trees: Portraits Of Time"*. Here you can have a sneak preview of the book, full of strangest and most magnificent trees ever.
