Global Forest Resources Assessment 2020 (FRA 2020)

<http://www.fao.org/forest-resources-assessment/2020/en/>

FRA 2020 examines the status of, and trends in, more than 60 forest-related variables in 236 countries and territories in the period 1990–2020.

The information provided by FRA presents a comprehensive view of the world's forests and the ways in which the resource is changing. Such a clear global picture supports the development of sound policies, practices and investments affecting forests and forestry.
